

Metal Ceilings & Profile

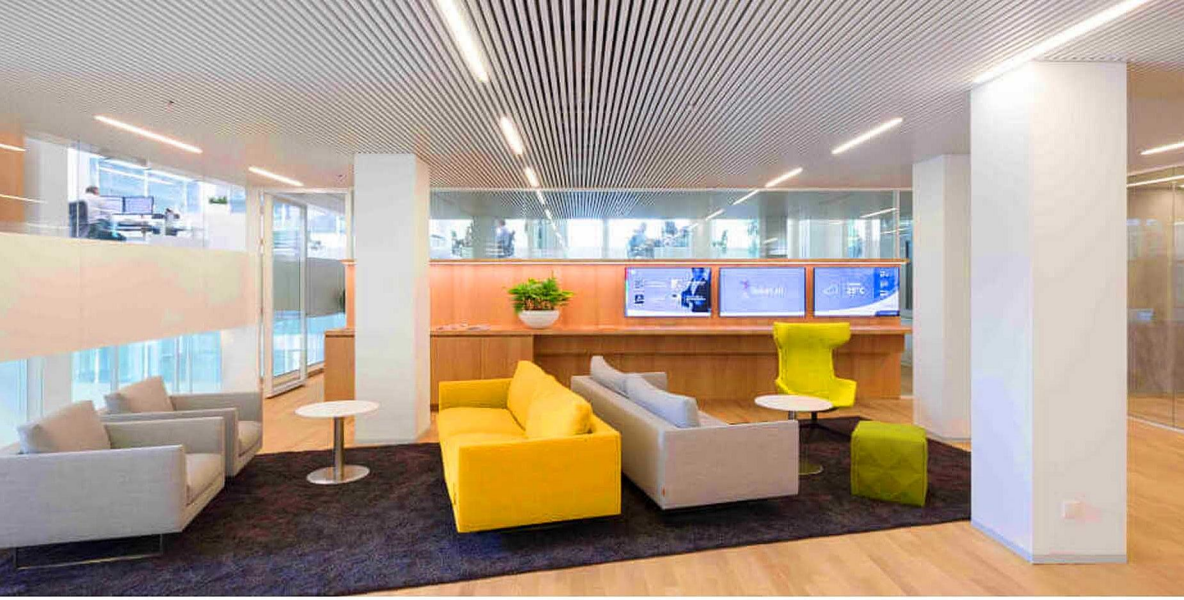

CELESTIALS[®] **CEILING & PROFILE**

Celestials Metal Ceilings are made of strong, lightweight aluminium and zinc coated steel or stainless steel. They are pre-painted and treated for long life, rust free performance, fire and moisture resistance.

All Celestials Metal Ceilings are designed for simple and economical installation on any standard exposed systems. They are easy to install and can be removed with minimum tools.

Products are offered both in Aluminium and GI having Plain surface or Perforated surface. The perforation will define the visual appearance and also influence the acoustic performance of the ceiling.
